☐ **Multispot Custom Canopies**

Multispot Custom is a configurable system that allows users to customize their pendant by selecting from standard components - pendant type, pendant height, number of pendants, and canopy/mounting type or by designing a custom canopy.

Standard mounting components include single light, three to five light, six to ten light, eleven to twenty light, and twenty-one to thirty light options in round, square, rectangle, or trimless configurations. Completely custom mounting solutions are also available.

Dimming is based on driver capabilities (a minimum of 3 pendants are required to dim, single pendants are not dimmable). Fixtures must be series wired and meet minimum load ratings of the connected driver when running multiple units on one driver.
Parallel wiring of pendants will result in non-warranty failure.
Alternate 24V models are available for simplified dimming control if needed.

Round Custom Canopies

Custom Design Guidelines

Completely custom canopies enable the creation of site specific designs. The designer decides how many pendants, what shapes and size canopy/mounting, and the finish.

Guidelines

- Canopies can be almost any size and shape and typically consist of 4' x 4' sections (each section can weigh up to 150 pounds)
- All Fabbian canopies feature a flat bottom with no visible supports to create a clean ceiling detail.
- Canopy can be recessed or surface mounted

Get Started

- Specify shape and size
- Submit CAD layout with hole patterns
- Specify plenum or non-plenum installation
- Specify Surface or recessed mounting
- Specify finish - white, black, polished mirror, or custom RAL paint number
- Contact Sales@fabbian.com to submit custom request
