Pendant light, and driver

Notes

Create a custom Multispot Ari configuration by selecting number of pendants, pendant heights, and canopies. 59” - 98” - 157” - 32’9” Dimming is based on driver capabilities. If running multiple units on one driver, fixtures must be series wired and meet minimum load ratings of the connected driver. 75 feet maximum wire length from beginning to end of series connection.

Description

Multispot Custom is a configurable system that allows users to customize their pendant by selecting from standard components - pendant type, pendant height, number of pendants, and canopy/mounting type or by designing a custom canopy. Use the 1 light trimless recessed canopy to create a seamless looking ceiling. Dimming is based on driver capabilities (a minimum of 3 pendants are required to dim, single pendants are not dimmable). Fixtures must be series wired and meet minimum load ratings of the connected driver when running multiple units on one driver. Parallel wiring of pendants will result in non-warranty failure.
