COMPANY PROFILE

Company overview.

Established in 1961 in the Venetian countryside, Fabbian is one of the premier Italian lighting manufacturers operating in the modern design market, designing and manufacturing lighting fixtures for residential and commercial markets.

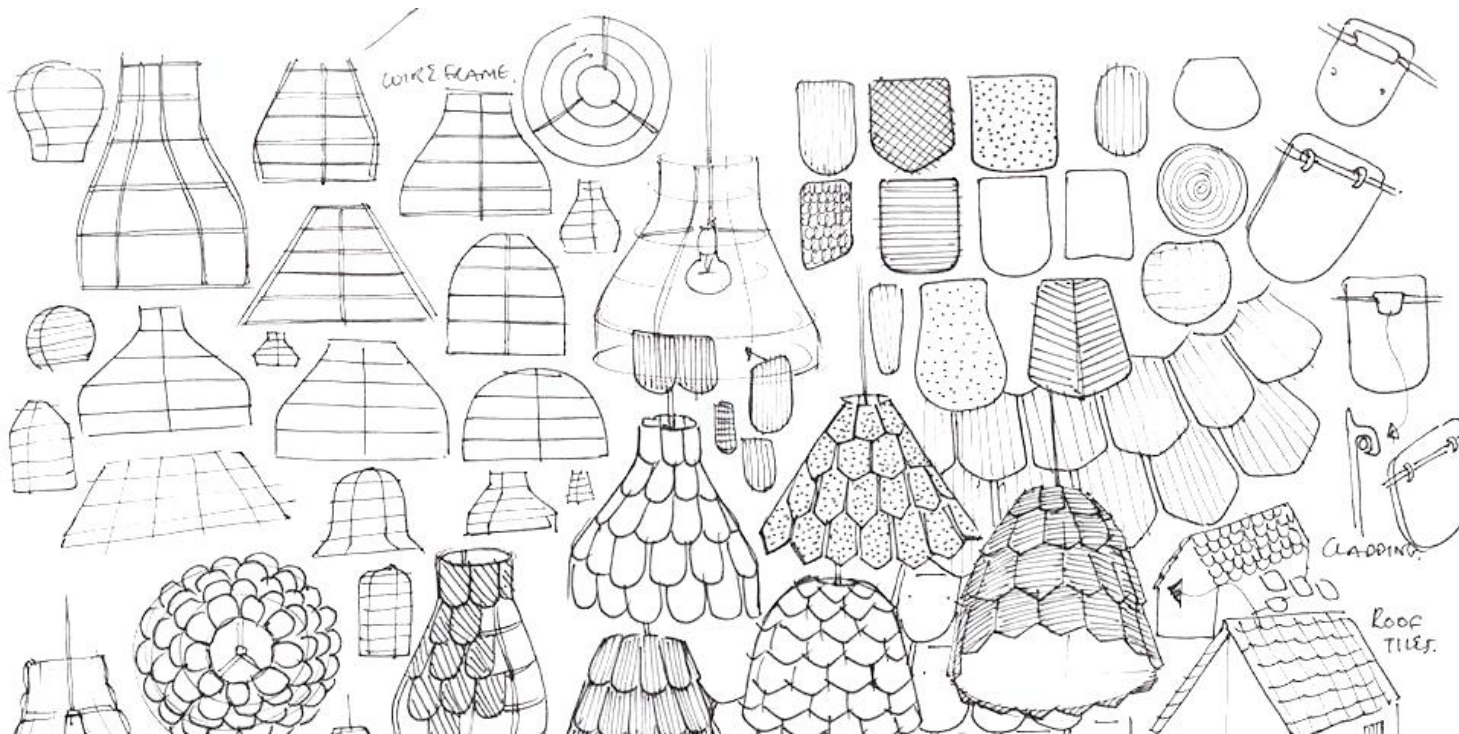

This history, combined with traditional Italian craftsmanship and the finest quality, keeps Fabbian a prominent brand that is internationally recognized in the architectural and design communities worldwide.

COMPANY PROFILE

Company overview.

The endless research on new materials, trends, and aesthetics has always been combined with market demands and new business opportunities.

From the very beginning to the design application, the product life cycle is strictly controlled to make sure that each light fixture meets the highest quality expectations and safety requirements.

These components give Fabbian products a vast and diversified array of inspirations and styles, which is also ensured by yearly prestigious collaborations with well-renowned and emerging designers.

COMPANY PROFILE

Company structure.

Proudly headquartered in Castelmino di Resana, in the **Venetian Countryside**, the company has an international outreach.

From **Venice**, it manages directly the European region, while it distributes the products through agents or importers in the other macro-geographical areas (Greater China, Russia, South and East Asia, South America, GCC countries, Northern Africa).

North America.

With over 20 years in North America, Fabbian USA offices are located in the world's capital of design, **New York City**, just blocks from Time Square.

COMPANY PROFILE

Designers.

Fabbian has collaborated with some of the most prestigious designers throughout the world to create unique elements for your home and business.

F07 Lumi

Fabbian USA is proud to showcase the Lumi Collection! A complete collection of classic blown glass fixtures.

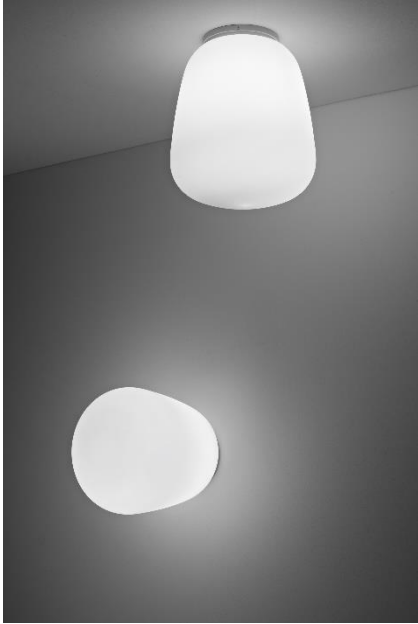

The collection created by lighting designers Alberto Saggia and Valerio Sommella was designed with the precise idea to go beyond the typical round shape. This concept led to the creation of Lumi.

The name Lumi was chosen for two reasons: the word *lume* in Italian is synonymous with **light**; in Finnish, the same word means **snow** and this resembles the collection's soft and delicate shapes.

F07 Lumi - The Collections

The North American collection of Lumi includes four families:

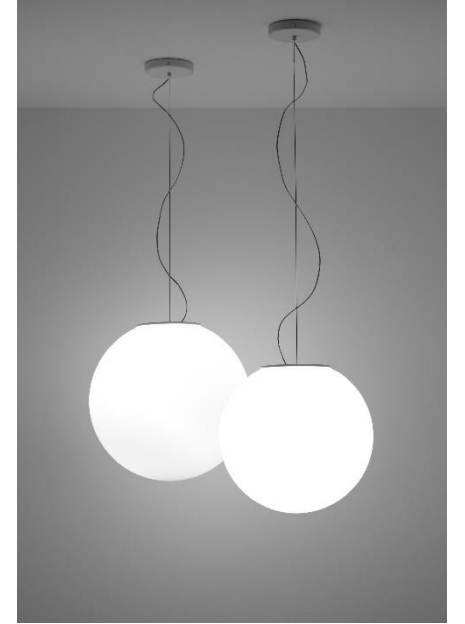

Baka

Mochi

Mycena

Sfera

The families include pendants, wall/ceiling mounts, and table lamps for indoor applications. The collection as whole offers a wide range of glass sizes (ranging from 5" to 24" diameters!) as well as a choice of lamp types (LED, incandescent or halogen).

Lumi's classic looks and styles are suitable for both commercial and residential applications and are the best selling and foundational member of our Decorative assortments.

F07 Lumi - The Glass

Lumi's defining characteristic are the blown glass diffusers. The soft forms are made of white blown-glass with a satin finish. Each glass is hand blown by a master craftsman.

The shape and finish of each glass is designed to provide evenly diffused illumination.

How it's done:

Lumi glass are created using **spinning molds**.

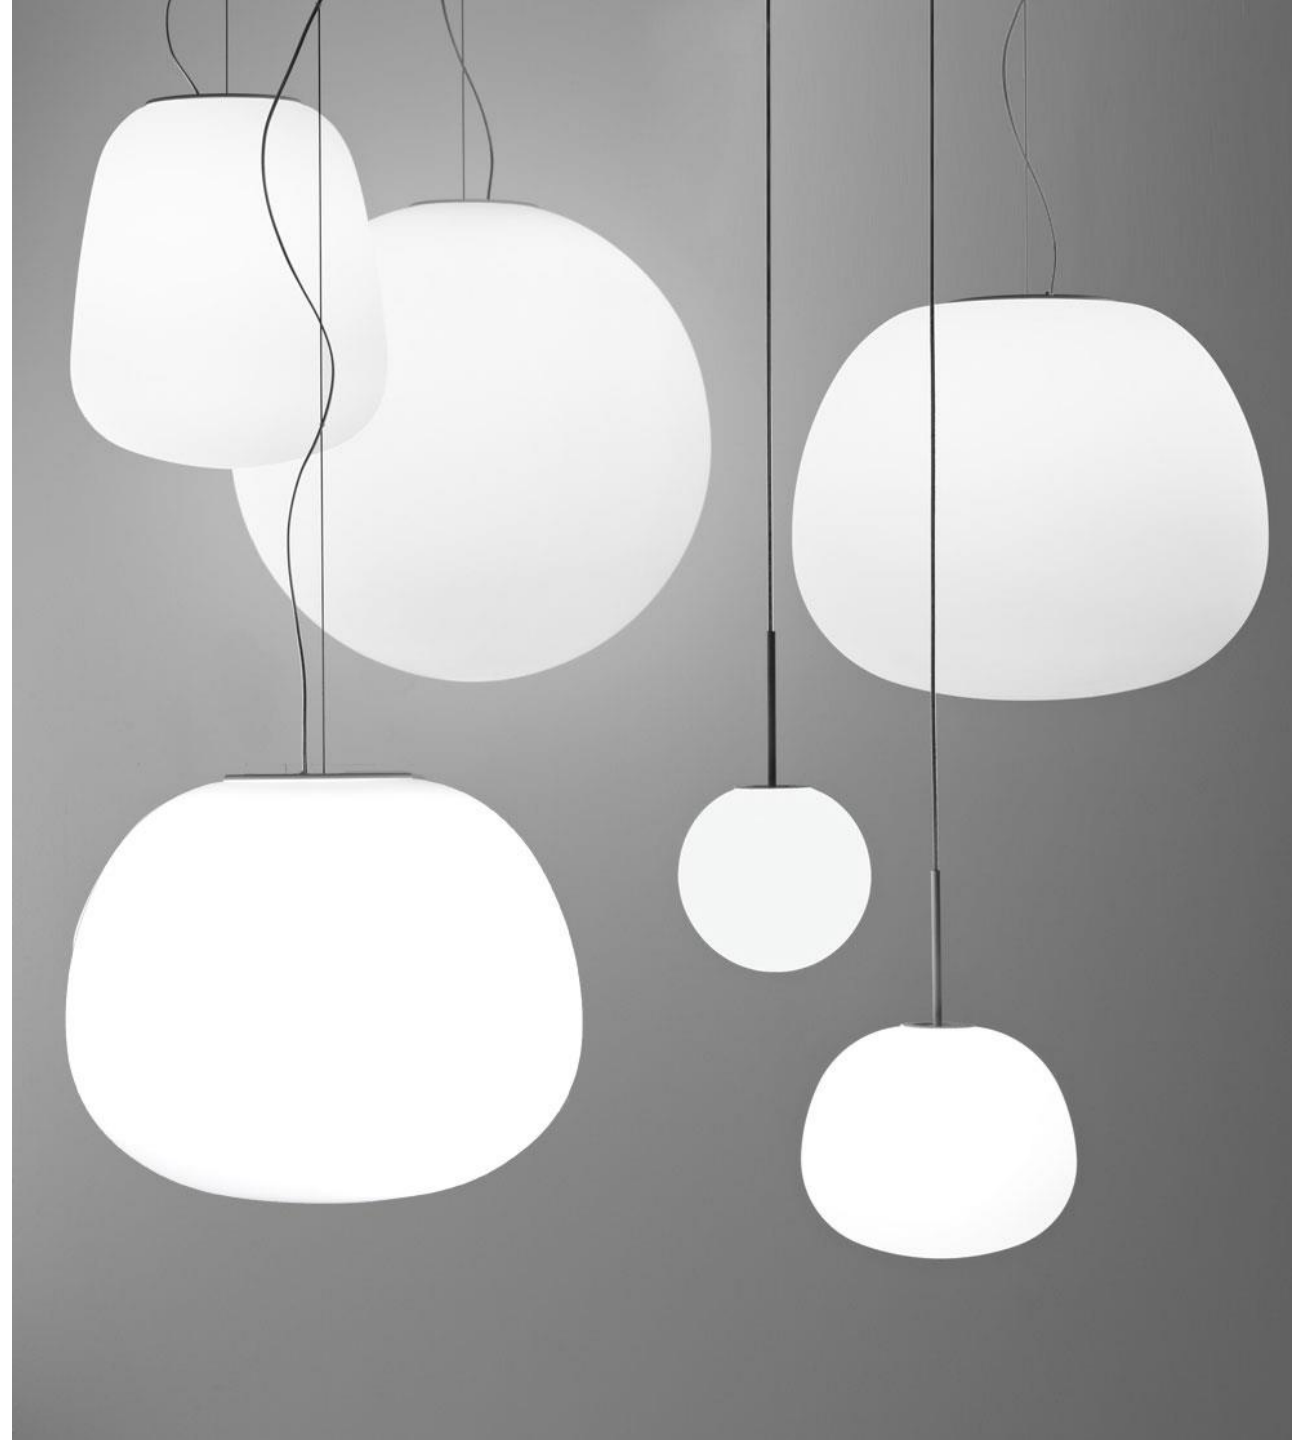

These molds allow the glass blower to create uniform/symmetrical shapes.

The glass is shaped by blowing a hot glass bubble inside the mold while spinning to maintain **symmetry**.

F07 Lumi - Specifications

Lumi's vast range of products share these foundational common traits.

- Satin finish, white blown glass diffusers
- Fixture and lamp bodies are white painted metal.
- Products are offered in halogen, incandescent or integral LED lamp types
- Integral LED products are all line voltage (120V), 3000K, CRI > 80, and are dimmable with a standard LED or ELV dimmer.

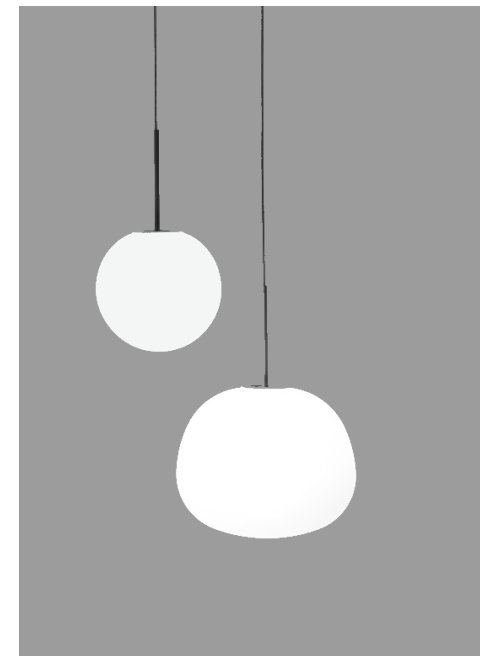

F07 Lumi - Installation

Lumi Pendant Mounting Installation:

- Smaller Pendants:
 - Single cable with ~6" stem for leveling
- Larger Pendants (12"+)
 - Glass fitter equipped with **leveling mechanism**
 - Cables can be bound together with the included clear bands
 - Eliminates long balancing rod atop fixtures for a cleaner aesthetic, especially in larger scale fixtures.

Options:

- Wipe down cover plate (Optional for 12"+ models)

F07 Lumi - Installation

Lumi Pendant Cord Management for Larger Pendants (12" +):

The larger Lumi pendants suspension systems include a steel support cable, clear electrical wire, and clear bands.

The electrical wire can be installed in two different ways using the included bands:

Straight - the wire can be pulled straight and secured to the support cable with the bands.

Swagged - the wire has some slack in it and is 'swagged' up the length of the cable. The bands secure the swags into place.

F07 Lumi - Installation

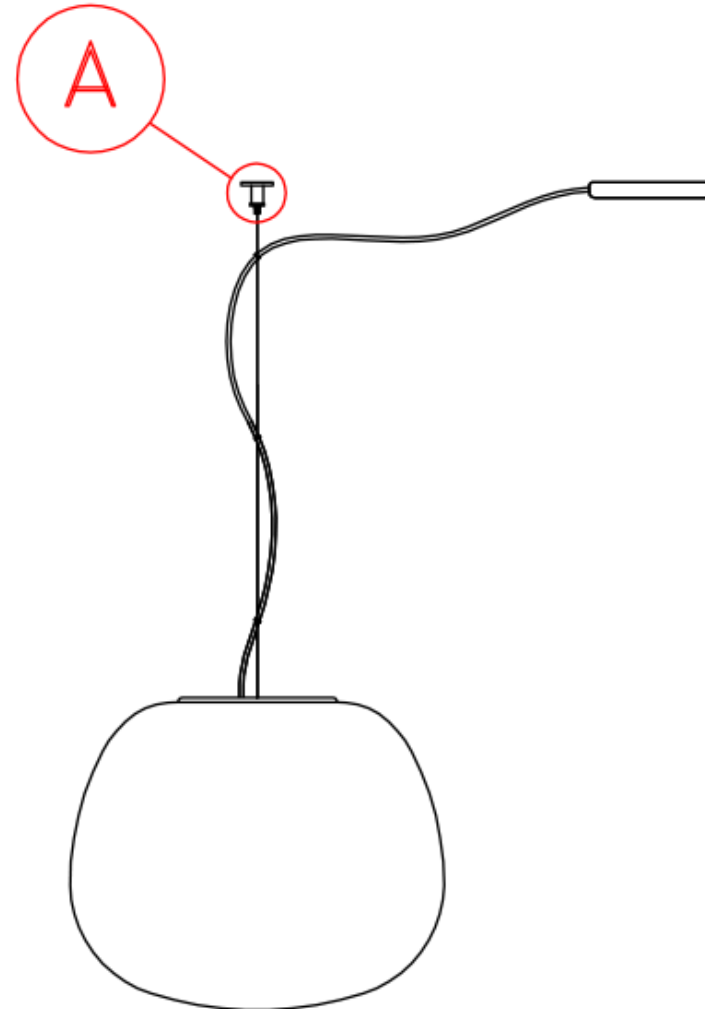

Pendant Alternate Mounting:

- Offset mounting hardware is included with pendants that have separate support cable allowing j-box to be located away from fixture.
- Hardware can be used with or without the cover disk.

Benefits:

- Simplifies installation for the following conditions:
 - Sloped ceiling installations
 - Through ceiling installations (ie. Slatted ceilings)
 - Single J-box can now feed multiple pendants
 - If power is in a non-visible area, no canopy niceties to manage
