Acustica

Designed by Gio Minelli & Marco Fossati

In a simple twist of irony, Acustica draws its inspiration from a drum cymbal, the antithesis of auditory comfort. The large and thin lampshade is designed to absorb surrounding sounds and create a high level of acoustic comfort. Acustica's shades can adjust from level to inclined positions for dynamic and creative arrangements around its central fixed light source. Acustica is ideal for public spaces, such as restaurants, luxury offices, and large waiting areas. Offered in five color choices and two diameters.

Acustica shades are made of two sound-absorbing materials that come in either a 35.4" or 47.25". Their outer shell is made from recycled PET. The structure is in anodized black aluminum with an opal PMMA (Polymethyl Methacrylate) diffuser. 20W 120-277V 1604 lumens, 90 CRI 2700K or 3000K 0-10V dimmable high-efficiency and flicker-free LED source.
