

XY&Z F63

Product Design
Consultant

Gensler

Inspired by nature's ability to propagate from a single seed, XY&Z F63 encourages a proliferation of light from a single point to evolve and grow throughout the space, bringing light to all areas at every plane.

Fabbian collaborated with Gensler as the product design consultant for XY&Z – a flexible and functional decorative lighting system for hospitality, retail, residential, and corporate environments.

The multi-layered glass shades, handcrafted in Veneto, Italy, serve as the central element of XY&Z. And its versatile mounting system enables designers to create lighting landscapes in organic and grid arrangements.

XY&Z is offered with integral 24V LED (2700K, 3000K, 3500K, or 4000K) or E12 lamp options. The inner glass shades are available in 14 different color and pattern variations. The outer glass features a smooth, clear finish to encapsulate the inner glass.
