

Custom Solutions

•Fabbian

Fabbian's diffusers are crafted by Venetian glass masters using handblown, cast, molded, and pressed methods using borosilicate, crystal, and triple layer glass to produce optimum illumination, diffusion, effects, and functions.

Fabbian uses only premium plating, anodizing, and powder coating finishes to ensure high-quality results from start to finish.

Fabbian's custom solutions include configurable systems for custom looks with off-the-shelf speed and ease, existing product modifications, including finishes, colors, voltage, and LED traits, and completely bespoke designs for site-specific installations.
